CONSULTANT DEVELOPER at **ThoughtWorks**
since **January 2016 (3 years and 2 months)**
Working with clients from Brazil, Chile and USA using a wide range of technologies like Kotlin, Python, JavaScript and Java 8. I am currently part of a team responsible for building different RESTful services in a microservices environment, applying lean and agile techniques on a daily basis. Such techniques include (and are not limited to) CI/CD, TDD, Pair Programming, Pull Requests and code review. We've recently started to work in front-end products as well, so I've been trying to learn more about React and its ecosystem in order to support the new products. I'm also one of the head mentors of the [Aceleradora program](#), which aims to teach college students about agile software development in practice through the implementation of a real project with a real client.

BACKEND SOFTWARE DEVELOPMENT INTERN at **4All**
from **October 2015** to **December 2015 (2 months)**
I have helped implement the company's first REST API using Node.js and MySQL. We've used git, TDD and Kanban. We had no control over infrastructure or deployment cycles (it was managed by somebody else for security, since the company was still in its early days).

SOFTWARE DEVELOPMENT INTERN at **Vortigo**
from **June 2015** to **October 2015 (3 months)**
Maintained and developed different sorts of software like a small CMS built with PHP and CodeIgniter, an Android application and a product catalog system built in Java 7, Spring MVC, MSSQL Server and MySQL.

SOFTWARE DEVELOPMENT INTERN at **Aceleradora**
from **September 2014** to **May 2015 (8 months)**
Developed two open source projects for university professors from PUCRS. Learned how to work in an agile team. The products were developed using Java 7, Spring Boot, Vraptor, Hibernate, PostgreSQL and Heroku. On both teams I worked at we used git, pair programming, Kanban and CI/CD practices.

SOFTWARE DEVELOPMENT INTERN at **TOTVS**
from **January 2014** to **September 2014 (8 months)**
Maintained and developed custom features for the Datasul ERP product, using Progress 4GL and custom frameworks.

TRAINING

Computer Information Systems Bachelor Degree at **Universidade do Vale Rio dos Sinos** since **June 2017**

ThoughtWorks University at **ThoughtWorks Pune, India** from **January 2016 to February 2016**

Computer Systems Analysis Technical Degree at **FAQI** from **2013 to 2015 (incomplete)**

Students to Business at **Microsoft Innovation Center** from **October 2013 to December 2013**

Information Technology Technical Course at **FAQI** from **January 2011 to June 2013**
